

ISA Standards from IHS

The Importance of Standards Management

Subscribing to ISA standards in IHS Standards Expert™ provides:

- a single source for ISA and related standards across your organization
- improved productivity and elimination of “hidden” project costs with 24/7 worldwide access
- a single company-wide interface that minimizes confusion and expedites awareness and training.
- currency and integrity of designs with hourly updating, project/watch lists, and email update alerts
- improved compliance through information sharing and collaboration of industry requirements and quality standards.

Delivery Options

Internet – IHS Standards Expert – subscription, custom collections, or individual document purchases

Intranet – IHS Intra/Spex – “Behind the firewall” solution for companies with no/restricted internet access

DVD – *Worldwide Specs & Standards* – index and documents on DVD – updated every 30 days

Integration – Various options, including XML Feeds and WebServices

DON'T JUST ACCESS ISA STANDARDS, *MANAGE THEM*

IHS provides a comprehensive, online Standards Management Solution that brings critical ISA and related standards directly to the desktops of your users on demand, along with the tools needed to ensure that your entire organization is kept up-to-date on the latest requirements for compliance and safe, efficient design and operations.

Within a single company-wide interface, you can access and manage content from ISA as well as from over 370 additional sources including International, Regional, National, Local, Corporate sources plus key Government and Military standards (subscriptions required for document access). The total data set represents 1.2 million standardization documents.

Problem Solved!

| Function | Problem | Problem Solved |
|---|--|--|
| Engineer – Design, Compliance, Safety | Excessive time retrieving needed information to support rapidly changing technology cycles. Information is not always accurate or complete. | Easy, fast, and intuitive searching, navigation and monitoring of ISA and related standards from any desktop. |
| Librarian, Standards Manager | Source management: Lack of effective corporate standards management is adding to increased costs, decreased ROI, and compliance risks. | Single corporate source for ISA and other standards with controlled document retrieval and notification of revisions. |
| Technicians, Mfg Engineer, Quality Control & Assurance | Difficulty accessing current standards or changes in standards required for compliance and quality assurance. Multiple standards are needed to meet global market requirements | IHS provides the world's most comprehensive collection of industry and military specifications and standards, updated daily for currency, compliance, and reliability. |

The ISA Publications Collection from IHS

The ISA Publications Collection from IHS includes active ISA standards, specifications and recommended practices. Over 150 documents cover a wide range of topics for instrumentation and automation professionals, reflecting the expertise of over 4,000 industry experts around the world.
