

NBBI and IHS

Unparalleled Electronic Access to the NBBI NBIC

Publications created by the National Board of Boiler and Pressure Vessel Inspectors (NBBI) are critical to ensuring the safe operation of boilers and pressure vessels. This is particularly true of the National Board Inspection Code (NBIC), which has been adopted by nearly all U.S. states and cities and Canadian provinces and a number of federal regulatory agencies. It is the only standard recognized worldwide for in-service inspection repairs and alterations of boilers and pressure vessels. And now, for the first time, the NBBI NBIC is available online through IHS Standards Expert™.

IHS is a global leading provider of standards and specifications. Our standards management system, IHS Standards Expert, contains the world's most comprehensive and widely used collection of technical standards information. It provides direct access to more than one million documents—including the NBBI NBIC.

Using IHS Standards Expert

IHS Standards Expert offers online access to the NBIC and additional NBBI publications, along with other technical standards and specifications. By subscribing to publications using IHS Standards Expert, you benefit from all the features of this powerful standards management tool.

Anytime, Anywhere Access

Forget about being tied to a PDF stored on a computer or a hard copy document. With IHS Standards Expert, you can connect directly to publications such as the NBIC anywhere you may be, whether it's on the road, in your office, at home or on site inspecting equipment. All you need is a computer with online access.

Flexible Search Capabilities

When you use multiple standards and specifications for your job, it can be difficult to determine exactly which document you need. IHS Standards Expert makes it easy to find the right document by allowing you to quickly search the title, abstract and/or the full text of documents. You also can use this functionality to find new publications that you might need to subscribe to.

Daily Updates

Standards change frequently. A single standards development organization (SDO) can release hundreds of new documents, revisions, re-approvals and withdrawals a month. IHS Standards Expert ensures all the standards you subscribe to are kept current with daily updates. You don't have to worry about making sure your information is up-to-date because IHS Standards Expert does all the work for you. And it keeps you informed of these updates through document change email alerts.

Coming Soon: An Enhanced HTML Version of the NBIC

The ability to access an electronic copy of the NBIC through IHS Standards Expert offers incredible flexibility. Soon, users will also have the opportunity to gain even more flexibility and usability by subscribing to an enhanced HTML-based version—IHS NBIC Advantage.

IHS NBIC Advantage will provide the same anytime, anywhere access as the PDF version available through IHS Standards Expert, while offering even more ease of use. Ideal for both experienced users of the NBIC and novices, the product's built-in search capability will make it easy for users to quickly find the information they need. Users will also be able to create bookmarks that allow them to quickly go back to frequently accessed pages. Furthermore, IHS NBIC Advantage will hyperlink many of the cross references found throughout the document, so that users will be able to jump directly to cross-referenced material.

With IHS NBIC Advantage, you will have the ability to collaborate with colleagues by attaching notes to any document

or paragraph within a document, and then sharing this commentary with individuals throughout your organization. You will also be able to collect and preserve company expertise by integrating important company information and knowledge with relevant content in the NBIC, allowing your company to retain this information for future use. In addition, you will be able to easily share your interpretive analysis by making a note within any portion of the NBIC so co-workers can have the information available at the point of need.

The IHS Boiler and Pressure Vessel Store

While NBBI publications are critical for your job, there are a number of other documents you might need to reference as well. The IHS Boiler and Pressure Vessel Store is your key source for important boiler and pressure vessel codes and standards. It includes standards provided by SDOs such as:

- ASME
- API
- NBBI
- BSI

By using IHS Standards Expert to subscribe to the wide variety of publications offered by these SDOs, you'll benefit from a single point of access for your most important technical resources.

Also, as new versions of the NBIC are released, IHS NBIC Advantage will make it easier for users to track changes that have been made to the document. You'll be able to compare different versions of the NBIC to quickly see what additions, deletions and modifications have been made.

IHS NBIC Advantage will complement another popular document that is available in HTML—the ASME Boiler and Pressure Vessel Code (BPVC). Also offered by IHS, the HTML version, which is called IHS ASME BPVC Advantage, provides online access to the full content of the BPVC, along with ASME electronic stress tables and referenced ASME standards.

Additional Purchasing Options

Different users of NBBI publications have different requirements. That's why IHS offers several purchasing options for the NBIC and other NBBI publications. Along with IHS online products, users can purchase:

- Single document downloads
- Hard copies
- Documents on CD-ROM
