

IHS Markit™

ENGINEERING & PRODUCT DESIGN

Honoring the US observance of World Standards Day - October 27, 2016

From improving safe operations to delivering reliable products and services to increasing engineering efficiency, codes and standards provide the trusted and authoritative knowledge critical to business.

IHS Markit honors the tens of thousands of technical professionals who volunteer their time and expertise to develop and enhance these codes and standards. We honor the standards developing organizations who provide the leadership and infrastructure to facilitate and deliver those codes and standards. And we honor those businesses that adopt, educate and ensure conformity with these codes and standards.

For more than 55 years, companies in asset-intensive industries have relied on IHS Markit to inform and accelerate engineering decisions. All along, IHS Markit Engineering & Product Design has partnered closely with the standards developing organizations, technical professionals and customers; leading the industry with the highest **information quality standards** and **continuous enhancement** of our standards management and knowledge discovery solutions. Our *Engineering Intelligence* solutions unify trusted third-party standards and technical content with internal enterprise knowledge and tools to accelerate engineering decisions and workflows.

Information, tools & expertise yield faster, smarter engineering decisions

370+ standards organizations worldwide

1.7M+ standards, codes and specifications

30+ leading technical publishers

10K+ widely used technical eBooks

75M+ vetted technical publications

60M+ global patents

Driving Profitable Growth

In the past year alone, we have delivered on customer requests for more content, search enhancements and usability improvements. Customers are thrilled with new search and notification enhancements to Standards Expert, expanded partnerships including new exclusive relationships, and the **Engineering Workbench**, a breakthrough engineering platform that further improves engineering efficiency with enhanced standards optimization and knowledge discovery tools.

Today, **650,000+ engineers** representing over **4,200 leading global companies** rely on our Engineering Intelligence solutions to:

Grow Revenue

Identify new markets, accelerate time to market and better leverage intellectual property

Boost Innovation

Recognize market trends, solve problem & generate ideas faster

Increase Profitability

Boost engineering productivity, discover and reuse critical knowledge, reduce costs, & improve quality

Mitigate Risk

Ensure compliance, minimize product redesigns and recalls, and avoid litigation

Delivering Customer Value

38% cut in component costs, resulting in \$77 million of savings on a single project

\$21.5 million in first year sales on a new product leveraging an existing technology

75% reduction in the time needed to resolve a critical part failure, reducing corrective action by 3 weeks

33% reduction in engineers' research time

100% compliance with relevant industry regulations

“In today’s working environment it is critical to continue driving efficiency and productivity. IHS has freed up time that our engineers can use on high-value activities.”
